ABOUT US

We have established ourselves as a leading company in the Air Compressor industry, offering unrivalled sales support, servicing and manufacturing. We have over 30 years experience in the industry and are able to assist in Hire, Purchasing, or Financing your new equipment to suit your needs. We also offer maintenance and servicing of air compressors, installation, filtration systems, ancillaries, condensate management and energy efficient compressors.

OUR SERVICES

- Compressor Servicing
- Compressed Air Systems
- Call Out 24/7
- Maintenance Contracts
- Compressor Sales
- Pipework Installations
- Spare Parts & Lubricants
- Complete Turnkey Systems
- Energy Air Audits
- Air Treatment Solutions
- Air Tools & Fittings
- Complete Sealey Tool Range

PRODUCTS

We offer Air Compressors, Ancillaries, Compressor Service Kits and Lubricants for many brands of Air Compressor Manufacturers. With the support from all Leading OEM's, we are able to remain competitive in the current market.

TRADE COUNTER

OPEN 8:00-16:30 - Monday-Friday

Offering a range of Compressor Spare Parts, Service Kits, Sealey & Siegen Hand Tools, Air Tools, Fittings and Lubricants.

Click & Collect also available.

Fini - Micro:

Compact design and very quiet operation - suitable for direct installation in the working environment for maximum convenience and reduced installation.

Simple Electro-mechanical control- User friendly automatic control for safe operation and simple access to operating value.

Advanced cooling system - The deployment of the thermostatically controlled centrifugal fan reduces noise and saves energy. The large surface area coolers for the air and oil ensures cool operation and lower air outlet temperatures even at higher ambient temperatures.

POLY-V belt drive system - Providing three times the service life of normal V belts (TYPICALLY 12000 Hours) with much greater drive efficiency improving output and saving power.

IE3 High efficiency Motors - Allowing reduced energy consumption

Flexible Range - 2.2kW - 5.5kW in both 8 & 10 bar, available with freestanding cabinet or with 200Lt air receiver and with on board refrigerated dryer.

2 year warranty (extended warranty available, buy & finance options available)

ENERGY EFFICIENT

Fini - Plus:

Long life energy saving POLY V drive system

Compact modern design

Convenient ETM 2 electronic controller

IE3 electric motor allowing reduced energy consumption

Floor mounted, receiver mounted and receiver mounted with dryer versions Star delta starting, Quiet operation, Higher output

Available from 7.5kW - 75kW at pressures 8,10,13 bar

2 year warranty (extended warranty available, buy & finance options available)

ENERGY EFFICIENT

Power Systems - G-TEC:

The G-TEC compressor is a full feature complete compressed air station.

All of the individual components that would form a normal and very complex system, are assembled conveniently in to this one modular system, saving space and improving efficiency. The exceptionally low noise level means G-TEC can be installed directly into the workplace. The compressor, refrigerated dryer, dual filtration, singular condensate drain, air receiver and sophisticated DNAir controller 2 are all connected and assembled ready for immediate connection to your network.

Available from 7.5kW - 22kW at pressures 8,10,13 bar

Energy Efficient Inverter Driven Options Available

5 year warranty (buy & finance options available)

G-TEC everything you need to provide dry clean compressed air in one quiet, energy efficient, convenient and reliable system!

ENERGY EFFICIENT

Nuair - Stationary Piston:

Stationary Piston Compressors, Our Nuair range features proven and reliable single and two stage compressor pumps belt driven by a high-quality electric motor. Each model is complete with automatic controls for ease of use and economical operation. Maintenance is made simple by the availability of convenient service kits. Blue Star models are supplied with a two-year warranty on the pump and provide a reliable and robust solution for workshop and light industrial applications.

Range 1.5kW to 7.5kW, 255L/min to 1080L/min. Maximum pressure 10 Bar (145 psi)

All Piston Compressors are Available for Next day delivery!

Nuair - Portable Piston:

Portable Piston Compressors, The Tech Series direct driven compressors offer a proven and reliable compressor that has been assembled in a new and innovative way so as to offer additional benefits to the user. These machines are particularly easy to handle with a larger handle and wheels and offer convenient controls for simple pressure adjustment and quick release airline connections.

Our Range is HUGE from: 0.75 kw - 2.2 kw, 4 CFM - 13 CFM, available oil less, lubricated, direct drive, belt drive, single phase, three phase and 110 volts.

Nuair - Piston Petrol & Diesel:

Petrol & Diesel Compressors, Our new range of Nuair engine driven compressors have been designed to offer portable or stationary compressed air in both petrol and diesel formats. Where the need for total mobility is essential these robust, heavy-duty construction, low power consumption air compressor is ideal. Offering additional features, it ensures that the compressed air needs of mobile, commercial, automotive & agricultural operators are adequately and reliably catered for.

Range 5.5 HP to 13 HP, 390L/min to 945L/min. Maximum pressure 10 Bar (145 psi)

Tanair - Dental & Medical:

Dental & Medical Compressors, Designed specifically for the supplying the highest quality of oil-free compressed air necessary for the use of all equipment in the dental surgery and orthodontic laboratories and all other applications where high quality, clean compressed air is critical. These compressors are designed and manufactured with specific regard to the health of the patient and to safeguard the highest hygiene and air quality standards. The Medicalair program is available in two different configurations, both manufactured with the same high-quality oil-free pumps and components: Medical Series standard configuration and - Silenced configuration 55-57 dB(A). Both series are available with adsorption dryer.

Range 0.55kW to 4.4kW, 55 L/min to 470 L/min.

Tanair - Dryers & Filtration:

Refrigerated Compressed Air Dryers & Filtration. Refrigeration dryers are suitable for many industrial, automotive, workshop and professional applications. Completely Dry Air, Limiting Oil Or Water In your Air lines. Operating at a dew point of +3C they are ideal for normal manufacturing processes, where compressed air distribution system is indoors. (Desiccant & Heat/Heatless adsorption Dryers Available on Request)

- High Performance
- Low running costs
- Reliable in service
- Simple to operate
- Built to last
- Compact design
- Service friendly
- Environmentally friendly

ENERGY EFFICIENT

Tanair - Air Receivers & Installation:

Air receivers in vertical or horizontal arrangement finished with paint. Supplied with safety valve, drain valve, pressure gauge and certification. Range 50 Litres up to 9000 Litre. Maximum pressure 11 bar, Additional pressures up on request.

Here at Compressed Air Systems UK we offer service and installation of most major brand "pipework systems", we can include "surveys" and "air quality testing". You can call upon Compressed Air Systems UK for their pipework installations, surveys, system adaptations and innovative knowledge. If you have a new Warehouse, Factory Unit, Production Area or an existing system that requires re-designing or re-working, we can provide a comprehensive planning service with benefits of tailored requirements to suit your production needs. Here at Compressed Air Systems UK we provide a complete design and install service for your Compressed Air System.

Our team of pipework engineers are experienced in designing and installing all types of compressed air systems, from entire new distribution mains to minor modifications, all in accordance with the British Compressed Air Society's latest best practice, health & safety guidelines and industrial standards. Our vast experience enables us to recommend the best piping material to suit any particular site's needs, for all industries and applications.

Hydrovane - Hire Me:

Hydrovane - Hire me! Compressed Air Systems UK offer air compressor hire packages to meet customer's short and long-term requirements. Packages can be tailored to meet your specific requirements. Whether the requirement is for a short-term arrangement or longer periods of up to 5 years, Compressed Air Systems UK can provide a hire solution inclusive of all required installation and ongoing maintenance of the equipment. Hire can provide a cost-effective way of upgrading your compressed air system if budgets do not allow for outright purchase. Since hiring is treated as an operating cost and therefore tax deductible, it can be an ideal solution for many customers.

HIRE ME! Packages can be fully inclusive of all servicing and repair costs, full terms and conditions can be provided upon request.
